FEDERAL COMMUNICATIONS COMMISSION  
OFFICE OF THE SECRETARY

Ms. Donna R. Searcy  
Secretary  
Federal Communications Commission  
1919 M Street, NW  
Room 222  
Washington, DC 20554

Subject: ET Docket No. 92-298

Dear Madam Secretary:

Universal Broadcasting has been in business for over 25 years and we own and operate AM Stations in New York and Indianapolis. We have recently purchased the construction permit for WVNJ-AM, licensed to Oakland, New Jersey.

Universal has implemented the Kahn Stereo system with its POWER-side feature at WTBE. This system has dramatically improved the coverage of the station and made it much less sensitive to co-channel interference. We believe that this is a major technical advance and is especially helpful to high dial position stations, such as WTBE, which operates at 1520 kHz.

This system also has provided improved fidelity and intelligibility when our listeners use continuously tunable radios such as home radios and when listening at Long Island beaches with their boom-boxes.

Furthermore, this system, according to our engineers, has decreased interference to both adjacent channel and co-channel neighbors.

Accordingly, we respectfully request the Commission to select the Kahn system as its system standard.

Cordially yours,

UNIVERSAL BROADCASTING CORPORATION

  
Howard Warshaw  
President
